# study LLM with me

- class 1
  - what is our goal in this class?
  - how to study?
  - why study ai?
  - ai
    - what is ai?
    - what ai can do right now?
    - LLMs
      - what is LLMs
        - what is the principle of Large Language Models (LLMs) ?
          - like GPT (Generative Pretrained Transformer)
          - Digital neural networks and biological neural networks are the same in mathematical principles.
        - how to work with LLMs?
          - Train foundational large models:
          - Construct large model applications
